

FORT SMITH BOULEVARD ROADWAY IMPROVEMENTS

Construction is set to begin on the widening of Fort Smith Blvd. from Primrose Terrace to Rookery Avenue section 3 of Fort Smith Blvd. to re-construct the existing two-lane "rural section" to a new three lane "urban section" roadway. The new roadway will have concrete curbs, in-pavement bicycle lanes, and 5' wide concrete sidewalks. The project is expected to begin this week. We anticipate construction to take approximately two years. To reduce the impact of the construction project, the work is planned to be divided into several phases as follows:

- Phase I will be from Tradewinds to Deed Circle
- Phase II will be from Tradewinds to Primrose Terrace
- Phase III will be from Deed Circle to Rookery Avenue

The contractor will be required to limit the bulk of his construction work to the hours between 7:00am to 7:00pm, Monday through Friday. Heavy construction and temporary lane closures will be limited to 8:30 am to 4:30pm. to reduce construction noise early in the morning and minimize the impact to the local traffic during the morning and afternoon "rush" hours.

Information on the upcoming construction and traffic detours for Fort Smith Boulevard will be posted on this site as construction continues. Bowyer Singleton & Associates, Inc., a Construction Engineering and Inspection (CEI) consultant, will be overseeing construction for the City of Deltona.

Please note that if you have plants, irrigation, trees or anything planted in the City right of way, now would be a good time to move it. The City cannot be responsible for anything left in the right of way during construction. Please be aware that during construction, there will be a reduced speed limit posted. And lastly, please be patient as this project gets underway.

If you have any questions or would like additional information, please contact the project manager.

The project manager for this project is:

Jim Wagoner
