

### **Fort Smith Blvd Construction Notice for November 2008**

On Monday, November 10, water main construction will begin on Fort Smith Blvd at Sagamore Drive, and proceed west towards Tradewinds Drive. A second crew will start on Monday, November 17, installing the new water main from Sagamore Drive to east of Tassel Terrace. The new 16" water main will be installed on the south side (eastbound) side of Fort Smith Blvd. Utility crews will also be relocating buried telephone cables and power lines in these areas as the water main work progresses.

The contractor will need to close the eastbound lane in the areas that he is working, and will route eastbound and westbound traffic past the work site(s) using flagmen. Drivers are asked to exercise caution when driving through the work zones - follow instructions on the temporary traffic signs and watch for flagmen who will be directing traffic. This may be a good time to try one of those alternate routes that you've been thinking about.

Water main construction on Sagamore Drive and on Fort Smith Blvd between Tradewinds Drive and Tassel Terrace should be complete by the end of December.
